

1. Let's learn about ways of getting disaster prevention information and evacuation timing

4 Know the Target Areas for Evacuation Information Issuance

When there is a risk of flood or landslide, evacuation information will be issued according to the following table. Check the issuance classification of the evacuation information issued for your area of residence in advance.

Table with columns for Flood and Landslide Issuance Classification, and rows for various target areas like Ai 1 and 2-chome, Ayukawa 1 and 3 to 5-chome, etc.

Table with columns for Flood and Landslide Issuance Classification, and rows for various target areas like Sawaragihama 1 to 3-chome, Shimizu 1-chome, etc.

Table with columns for Flood and Landslide Issuance Classification, and rows for various target areas like Toyokawa 1-chome, Toyokawa 2 and 4-chome, etc.

(in the order of the Japanese syllabary)

Table with columns for Flood and Landslide Issuance Classification, and rows for various target areas like Hozumidai, Honmachi, Masago 1 to 3-chome, etc.

\*Areas that are not included in this list are not included in the target areas for evacuation information issuance.
